SUMMARY

Full Stack Developer with diverse experience in building and enhancing complex web projects. - Improved system efficiency and reduced integration time through effective module development in a comprehensive project. - Developed client-side features and enhanced backend operations, significantly improving scalability and usability. - Styled interactive systems and designed user-focused interfaces, elevating digital platform quality and user satisfaction. Aims to leverage comprehensive cross-stack expertise to improve and maintain features, share innovative workflows, and support team success in tech initiatives.

EDUCATION

Dr. Babasaheb Ambedkar Technological University

Feb 2021 - Jun 2024

Bachelor of Technology, Computer Science Engineering

SKILLS

- **Programming Languages:** C/C++, JavaScript, Java
- **Web Technologies:** HTML, CSS, SCSS, TypeScript
- **Frameworks and Libraries:** Tailwind.CSS, Bootstrap, React.js, Angular.js, Material-UI, Node.js, Express.js, React Native
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Other:** Data Structures and Algorithms, Object-Oriented Programming, Jira, Git, GitHub, Design Patterns, Full Stack Development

WORK EXPERIENCE

Agua Wireless System

May 2024 - Jun 2024

Junior Full Stack Developer

Developed applications using React.js, Material-UI, and Node.js to implement scalable full-stack solutions with structured design patterns.

- Built a comprehensive project from scratch, including four distinct modules, which resulted in a significant improvement in system efficiency.
- Streamlined integration processes and developed client-side features, applying JavaScript best practices to implement system improvements effectively.
- Enhanced code quality and managed databases by reducing redundancy using dynamic components, and wrote performant APIs, ensuring efficient cross-stack operations.

Kelp

Oct 2023 - Feb 2024

Software Developer Intern

Utilized Angular and Bootstrap to refine core module user experiences, resulting in more intuitive interaction and improved user satisfaction.

- Improved backend operational efficiency and system stability through optimized database management in PostgreSQL and developed backend using Nest.js.
- Resolved critical system bugs, resulting in enhanced overall system reliability.

DFIIE

May 2023 - Aug 2023

Frontend Developer Intern

React.js, Tailwind.CSS

- Led DFIIE website design, merging leadership and technical skills to boost digital platform quality.
- Developed an interactive event management system, streamlining organization and user participation.
- Implemented responsive design practices, ensuring seamless user experience across all devices.

PROJECTS

TiffinWala

Nov 2022 - Jan 2023

- Engineered a cutting-edge digital platform for the tiffin service sector, enhancing provider scalability by 40% and driving a 25% increase in customer engagement through targeted analytics.
- Refined a user-centric interface and responsive feedback system, leading to streamlined operations and improved customer satisfaction for the tiffin service sector.
- This approach streamlined operations and elevated customer satisfaction, creating a more engaging and user-friendly platform.
